SELF-ASSESSMENT

# Q3 2026

**Sara Ahmed**

Senior FP&A Analyst | Manager: Omar Khalid

2026-07-01 to 2026-09-30

| 8 → 5 | 3 wks | 6 / 6 | -40% |
|---|---|---|---|
| Close days | Budget ahead of plan | Departments onboarded | Ad-hoc data requests |

## SUMMARY

This quarter I focused on shortening the month-end close and getting the 2027 budget process started early. Close time dropped from 8 to 5 working days, and budget templates reached all six departments three weeks ahead of plan. Outside my objectives, I trained sales ops to self-serve their revenue dashboard.

## OBJECTIVES DELIVERED

### O1 Reduce month-end close time • Achieved

*Measure: 5 working days by Q4*

- **Cut month-end close from 8 to 5 working days.** Close ran 8 days because 8 bank reconciliations were manual. I owned the reconciliation step. I automated 6 of 8 reconciliations in Power Query and set a daily bank-file check.

  With: Treasury, Accounting

- **Bank reconciliation for 3 accounts now takes 2 hours instead of 1 day.** Built a fuzzy-match reconciliation template reused by Accounting.

### O2 Build the 2027 budget model • On track

*Measure: Approved by Nov 30*

- **Budget templates reached all 6 departments 3 weeks ahead of plan.** Last year templates went out late and 2 departments missed the deadline. I simplified the template to one tab per department and ran 6 walkthroughs.

  With: Department heads

### O3 Improve forecast accuracy • At risk

*Measure: Within 5%*

*No logged activity in this period.*

## KEY STAKEHOLDERS

| Stakeholder | What we worked on |
|---|---|
| **Treasury team** | Bank file formats and reconciliation automation |
| **Department heads (6)** | 2027 budget templates and walkthroughs |
| **Sales ops** | Revenue dashboard training |

## BEYOND MY OBJECTIVES

- **Sales ops self-service.** Trained 2 sales ops analysts on the revenue dashboard. Ad-hoc data requests to FP&A fell 40%.
- **New-joiner onboarding.** Wrote a 1-page close checklist for new analysts. Used by the team for every close since August.

## LEARNING AND GROWTH

- **Skills built:** Power Query fuzzy matching, Running budget workshops
- **Developing next:** Forecast accuracy: I am building a driver-based model with Sales for Q4.
